

Sentimentalists Sprint 2

How did we feel about the sprint?

Liked	Learned	Lacked	Longed For	Actions
<div></div>	<div></div>	<div></div>	<div></div>	<div></div>
<div>Having people with lots of different experience and views</div>	<div>No man is an island, let go and delegate</div>	<div>Structure around our 9am meetings: are they stand-ups? Or should we just always do 40 minutes and set an agenda?</div>	<div>I am not very sure about the milestone agreed by the group, still want to discuss it.</div>	<div>The team to post their entire lumina profiles in Slack, and everyone to take some time read each others</div>
<div>The project brief and direction</div>	<div>share and learn from the team</div>	<div>--- Daily stand ups can go off onto tangents</div>	<div>More open mindedness when it comes to generating an over all score for the product</div>	<div>Ana and Ellie to arrange a whole team meeting to deep-dive into the 'bias score' calculation</div>
<div>Ellie's mastery of grids and mockups, giving us real direction to what we are building</div>	<div>to ask for support</div>	<div>I think we should make time and talk about our Lumina profiles. I guess we will benefit to understand more about each ones strengths and weaknesses</div>	<div>To start writing some codeeeeeeeeeee</div>	<div>Jyothsna to look at how stand ups should run and impose this on the team</div>
<div>to be able to share frank thoughts in tough situation</div>	<div>Lot's about step functions</div>	<div>Working together on 'the entire solution'</div>	<div>Less 9am meetings?</div>	
<div>That we agreed on our milestones!</div>	<div>Github seems to make sense</div>	<div>Opportunities to pair</div>	<div>To find a way to work on each others components</div>	
<div>Being in a team after such a long time</div>	<div>I feel I am learning every day, technical and soft skills. This is the first time in in a total "collaborative project", working in a structure that I never worked before</div>	<div>Understanding of what will end up as a great end product</div>	<div>I was quick enough to open a Zoom meeting ;(</div>	
<div>Ana's continuous exploration of backend possibilities - so many features!</div>		<div>A little bit of direction on occasion</div>	<div>expertise in React</div>	

👍 0 💬 0 ✎

we have setup a regular catchup

👍 0 💬 0

Jyothsna's never-ending testing of our tools - awesome!

👍 0 💬 0

The supportiveness

👍 0 💬 0

The team spirit and passion

👍 0 💬 0

The diversity of minds in our team and how we are managing to communicate / bond well

👍 0 💬 0

being able make awesome presentations

👍 0 💬 0

that there is good progress

👍 0 💬 0

The massive challenge ahead of us

👍 0 💬 0

That our sprint review was awesome

The amazing feedback so

We have limited time! We can't do everything!

👍 0 💬 0

No one really likes pair programming but we know why we do it

👍 0 💬 0

Learned that there are many ways of getting AI results, things never shown in my Data Science course

👍 0 💬 0

accepting when things change with little notice

👍 0 💬 0

expertise in quite a few technologies - I will learn

👍 0 💬 0

Being quick to get 'it' soon enough

👍 0 💬 0

Clarity on when people are available/most WANT to pair/work together

👍 0 💬 0

Possibly more time ahead to be able to develop / implement proper ML code

👍 0 💬 0

far from our sponsors and
Tech Returners coaches
